Population Dynamics and Laboratory Ecology highlights the contributions laboratory studies are making to our understanding of the dynamics of ecological and evolutionary systems. Chapters address the scientific rationale for laboratory ecology, its historical role within the broader discipline, and recent advances in research. The book presents results from a wide range of laboratory systems including insects, mites, plankton, protists, and microbes. A common theme throughout the book is the value of microcosm studies in advancing our knowledge of ecological and evolutionary principles. Each chapter is authored by scientists who are leading experts in their fields. The book addresses fundamental questions that are of interest to biologists whether they work in the laboratory or field or whether they are primarily empiricists or theorists. Details a scientific rationale for laboratory systems in ecological and

evolutionary studies Offers a view on historical role of laboratory studies Includes examples of recent research advances in ecology and evolution using laboratory systems, ranging from insects to microbes Integrates mathematics, statistics and experimental studies An Applied Guide to Process and Plant Design is a guide to process plant design for both students and professional engineers. The book covers plant layout and the use of spreadsheet programmes and key drawings produced by professional engineers as aids to design; subjects which are usually learned on the job rather than in education. You will learn how to produce smarter plant design through the use of computer tools, including Excel and AutoCAD, "What If Analysis", statistical tools, and Visual Basic for more complex problems. The book also includes a wealth of selection tables, covering the key aspects of professional plant design which engineering students and early-career engineers tend to find most challenging. Professor Moran draws on over 20 years' experience in process design to create an essential foundational book ideal for those who are new to process design, compliant with both professional practice and the IChemE degree accreditation guidelines. Explains how to deliver a process design that meets both business and safety criteria Covers plant layout and the use of spreadsheet programmes and key drawings as aids to design Includes a comprehensive set of selection tables, covering those aspects of professional plant design which early-career designers find most challenging Employment relations, much discussed in other industries, has often been neglected in professional sports despite its unique characteristics. The world is at a crossroads today. A tiny minority of Muslims seems to be bent on hijacking the religion of Islam and bringing it into perpetual conflict with the rest of the world. Because of their actions, very few non-Muslims understand the real difference between Islam as it has always been, and the distorted perversions of Islam today. This book is an attempt to positively say what Islam actually is—and always was—as well as what it is not. “Lucid in its explanations, unassailable in its logic; a book of the moment; simply spot on.” – H.E. Muhammad Sa’ad Abubakar, The Sultan of Sokoto, Nigeria “Easy to read, easy to understand and easy to swallow and digest. It very beautifully explains what Islam really is, how it is explained in its sacred texts, and how it has been understood throughout centuries by the overwhelming majority of Muslims.” – Mufti Muhammad Taqi Usmani “A very much needed book, comprehensive, yet concise, easy to read, and authoritative. A must-read book.” – Shaykh Muhammad Al-Yaqoubi “A salient account of a mighty faith drawn in deft strokes by an insider. Edifying, broad, and stimulating.” – Shaykh Nuh Keller “Much anxiety comes from not properly understanding what

others think or believe. One example today is the widespread misunderstanding of Islam. So when a respected scholar of Islamic philosophy such as Prince Ghazi bin Muhammad writes *A Thinking Person's Guide to Islam*, it is of global significance. I welcome the publication of this book, convinced that interested readers will find much in it to inspire them and set their minds at rest.” – H.H. the 14th Dalai Lama, Tenzin Gyatso “A most authentic presentation of Islam in its contemporary context.” – Professor M. Hashim Kamali, IAIS, Malaysia “Exceptionally lucid in explanation, deeply scholarly and yet accessible on a popular level, this is an essential book for Muslims and non-Muslims alike at this time in our civilization.” – Revd Canon Professor Paul S. Fiddes, Professor of Systematic Theology, University of Oxford “A concise, luminously clear, and highly readable explanation of Islam from the pen one of its best educated and most influential advocates.” – Professor Miroslav Volf, Yale University Divinity School
